Data Processing Agreements and GDPR

Document owner: Legal & Compliance (legal@acme.test). Approved by: Priya Raman, CEO. Effective date: 2026-02-16. Review cycle: every 12 months.

1. Our two roles

• Processor for customers. FleetOS stores personal data on behalf of our customers: warehouse operators' names, badge IDs and the shift data linked to robot tasks. For this data the customer is the controller and Acme is the processor.

• Controller for our own data. For employee, applicant, supplier contact and marketing data, Acme is the controller.

2. Data processing agreements with customers

• Every FleetOS customer is offered Acme's standard data processing agreement, template LEG-DPA-01, together with the customer contract.

• DPAs are always reviewed by Legal & Compliance and signed by the CFO (Hannah Schmidt). Changes requested by a customer go to legal@acme.test; allow 5 business days.

• The DPA lists our sub-processors. Customers get 30 days' notice before we add a new sub-processor and may object in that period.

3. Data processing agreements with suppliers

When a supplier processes personal data for Acme (for example payroll, recruiting or e-mail tools), a DPA must be signed before any personal data is shared. This is part of the Supplier Contract Review Checklist.

4. Where data is stored

FleetOS customer data is hosted in the EU (Frankfurt region) and does not leave the EEA. A transfer outside the EEA needs the EU Standard Contractual Clauses and a transfer impact assessment approved by Legal & Compliance before it starts.

5. Personal data breaches

• Report any suspected incident to security@acme.test within 1 hour of discovery, as the Information Security Policy requires.

• Legal & Compliance assesses whether personal data is affected.

• Where Acme is processor: the affected customers are informed without undue delay and at the latest within 48 hours of discovery, so they can meet their own deadline.

• Where Acme is controller: Legal & Compliance notifies the Dutch Data Protection Authority (Autoriteit Persoonsgegevens) within 72 hours of discovery when the breach is notifiable.

6. Requests from individuals

Access, correction and deletion requests about Acme's own data go to privacy@acme.test and are answered within one month. Requests about FleetOS data are forwarded to the customer (the controller) within 5 business days.

7. When a customer contract ends

Customers may export their FleetOS data during the first 30 days after the contract ends. Their data is then deleted within 90 days after the end of the contract, including backups.

8. Records of processing

Legal & Compliance keeps the register of processing activities and reviews it every 12 months. Questions about privacy go to privacy@acme.test.
