Travel and Expenses Policy

Owner: Hannah Schmidt, CFO Applies to: All Acme Robotics employees and contractors travelling on company business Effective: 2026-11-02 Review cycle: Annual

1. Purpose

Acme Robotics staff travel regularly for customer deployments of the AMR-200 and AMR-500, FleetOS onboarding sessions, trade fairs and supplier visits. This policy sets out how business travel is booked and how expenses are claimed and reimbursed. Its aim is to keep employees comfortable and safe on the road while spending company money responsibly.

2. General Principles

• Travel only when a remote meeting would not achieve the same result.

• Choose the most cost-effective option that still makes sense given the schedule, safety and the purpose of the trip.

• Your line manager must approve the trip before you book. Trips outside Europe also need approval from a department head.

• Personal travel combined with a business trip is allowed, but you pay any extra costs yourself.

3. Booking Travel

3.1 Flights

• Flights under 6 hours are booked in economy class. This covers nearly all travel within Europe.

• For flights of 6 hours or longer, you may request a higher class in advance. The CFO must approve it.

• Book at least 14 days ahead where possible. Last-minute bookings should be justified in the approval request.

• Inside the Benelux and to nearby destinations such as Paris, Cologne and Düsseldorf, take the train instead of flying when the total journey time is reasonable.

3.2 Hotels

Hotel stays are reimbursed up to the following nightly caps, including taxes:

Location	Maximum per night
Standard (all locations unless listed below)	€180
London	€250
Zurich	€250

If a large event (for example, a logistics trade fair) pushes local rates above the cap, ask Finance for an exception before you book. Stays above the cap without prior approval are reimbursed only up to the cap.

3.3 Ground Transport

• Use public transport where it is practical.

• Taxis and ride-hailing are fine late at night, when carrying equipment such as demo units or spare parts, or when no reasonable public option exists.

• Car hire must be approved in advance. Choose a compact or mid-size vehicle.

4. Meals and Daily Expenses

• Meals during business travel are reimbursed up to €60 per day. This covers breakfast, lunch, dinner and non-alcoholic drinks.

• Unused allowance does not carry over from one day to the next.

• If a meal is provided, for example by a customer or at a conference, do not claim it.

• Customer entertainment is handled separately and must be approved in advance by Diego Alvarez (VP Sales) or your department head.

5. Submitting Expense Claims

• All expense claims must be submitted in ExpenseHub with receipts within 30 days of the expense.

• Every line item needs an itemised receipt. A card terminal slip alone is not enough.

• Choose the correct cost centre and project code. For customer deployments, use the customer project code.

• Claims submitted after the 30-day window may be rejected.

• Approved claims are reimbursed in euros with the next monthly payroll run. Foreign-currency expenses are converted at the rate on the transaction date.

5.1 Approval Flow

• The employee submits the claim in ExpenseHub.

• The line manager reviews and approves it.

• Finance checks it against this policy.

• Reimbursement is paid with payroll.

6. Non-Reimbursable Items

• Alcohol, except approved customer entertainment

• Minibar, in-room films and spa services

• Traffic or parking fines

• Upgrades not approved in advance

• Lost personal items

7. Questions and Exceptions

Send questions about this policy to Finance. Requests for exceptions go to Hannah Schmidt (CFO). Report ExpenseHub access problems to Erin Takahashi (IT Administrator). Repeated or deliberate breaches of this policy may lead to action under the HR disciplinary process, managed by Alice Moreau.
